Kurnool, Andhra Pradesh - 518010, India

EDUCATION

• Sandip University

Computer Science and Engineering – AIML, Nashik, Maharashtra, India

◦ CGPA: 8.55/10.0

Nov 2022- May 2026

Nashik, Maharashtra, India

• MJPAPBCWRJC Govt Jr College

Intermediate Education, Lepakshi, Ananthapuram, AP

◦ Percentage: 76%

Jun 2020 – Mar 2022

Lepakshi, Ananthapuram, AP

PROJECTS

• Student ERP Management Portal

Stack: Spring Boot, Spring MVC, Spring Data JPA, REST APIs, React.js, JavaScript, MySQL, Maven

- Built a **full-stack Student ERP web application** with a decoupled architecture – **Spring Boot REST API backend** and a **React.js frontend** – to manage student records, courses, and academic data.
- Designed and exposed **RESTful APIs** for CRUD operations on student profiles, enrollment, attendance, and marks, consumed by the React frontend.
- Applied **layered MVC architecture** (Controller – Service – Repository) with Dependency Injection for clean, maintainable, and testable code.
- Designed a **responsive React.js dashboard** for real-time data display and management of student information across modules.

• QByte Remote System Monitoring (Rental Machines)

Tools: Spring Boot, Core Java, Hibernate, JSP, SQL, SSH Keys, React JS

- Developed a web-based system to monitor rental machines across multiple remote systems using secure SSH key authentication.
- Implemented real-time tracking of system metrics such as CPU usage and system status from distributed machines.
- Built backend services using Spring Boot and Hibernate for efficient data handling and persistence.
- Designed JSP-based UI to display machine status and analytics on a centralized dashboard.
- Ensured secure communication between systems using SSH protocols.

• Freshness Detection System for Fruits and Vegetables

Tools: Python, TensorFlow, MobileNetV2, OpenCV, SQLite, React JS

- Developed a Machine Learning-based system to detect the freshness of fruits and vegetables using deep learning techniques.
- Used MobileNetV2 model achieving up to 99% accuracy for classification.
- Implemented real-time detection using live camera, image upload, and video input processing.
- Built user authentication system with login and registration functionality.
- Integrated OpenCV for image processing and SQLite for lightweight database management.
- Designed a simple web interface for user interaction and result visualization.

SKILLS

- **Programming Languages:** Java [Proficient]
- **Backend Technologies:** Spring Boot, Spring Web, JPA, Hibernate, JDBC
- **Web Technologies:** HTML, CSS, JavaScript, ReactJS
- **Database Systems:** SQL
- **Operating Systems:** Windows, Linux
- **Version Control & IDE:** Git, GitHub, Eclipse, Visual Studio Code, Google Colab, IntelliJ IDEA
- **Course Work:** Object-Oriented Programming, Data Structures and Algorithms, Postman, Computer Networks, Operating Systems, Database Management Systems, Machine Learning
- **Soft Skills:** Communication, Teamwork, Time Management, Leadership, Constant Learning, Adaptable, Presentation Skills

CERTIFICATIONS

- Java Full Stack Internship – **Kiran Academy Pune** (JavaByKiran) – Final stage; developed proficiency in Core Java, Spring Boot, REST APIs, and full-stack application development.
- Mern stack Virtual internship in edunet Foundation–AICTE. [[Certificate](#)]
- Java Internship. [[Certificate](#)]
- AI-ML Virtual Internship [[Certificate](#)]
